

# 3RD GRADE SCHOOL CLOSING WORK PACKET

# MASTER

WEEK 1		
	SUBJECT: CKLA (workbook)	
Check when completed	Page Number/s	Directions
	Pg. 21 Pg. 13	Read 2.5 pg. 21 then complete activity 2.1 on page 13
	Pg. 51-52 Pg. 41 Pg. 43	Read 4.6 on pages 51-52 then complete the questions on pg. 41 and the record facts page on pg 43.
	SUBJECT: ELA (packet)	
Check when completed	Page Number/s	Directions
	Pg. 1	Read the passage on hummingbirds and answer the questions on the back
	Pg. 2	Complete the Main topic and Main Idea page with the passage titled <u>A Toucan's Lunch</u> . Read the passage and answer the questions that follow.
	SUBJECT: MATH (packet)	
Check when completed	Page Number/s	Directions
	Pg. 3	Complete the front and back side of this fraction practice on comparing fractions and equivalent fractions. The page of fraction strips has been included as a tool to help you.
	Pg. 5 Pg. 6	Read the text book pages on Area (19.1) and complete the worksheet on page 6.
	Pg. 7 Pg. 8 Pg. 9	Read the text book pages on area and perimeter on pages 7-8 (19.2 and 19.4). Complete the workpage on pg. 9 of the packet.
	Pg. 10	Complete the front and back of the area and perimeter work pages.

Week 1

Name: \_\_\_\_\_

# HUMMINGBIRD

Hummingbirds are considered one of the smallest birds in the world. There are over 300 species of hummingbirds! Did you ever wonder why they are called humming birds? That is because their wings move so fast they make a humming noise.

Hummingbirds can fly in all kinds of directions. They can fly up, down, forwards, backwards, and upside down! Hummingbirds are mostly found in North and Central America. A hummingbirds diet is nectar from flowers, tree sap, and even tiny bugs.

Hummingbirds need to eat 5-8 times an hour. That's a lot of eating!

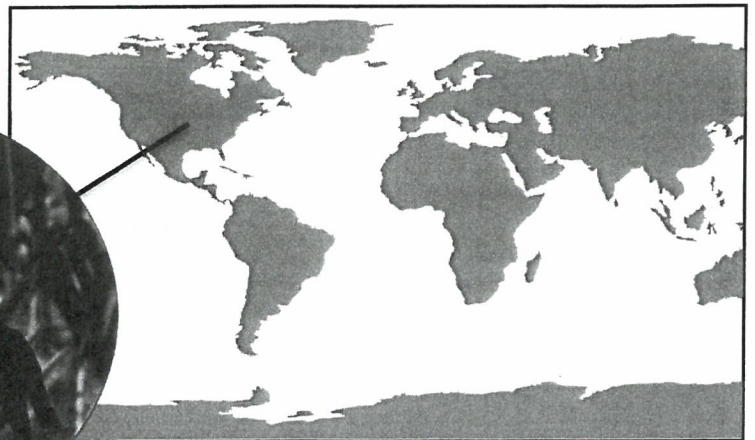

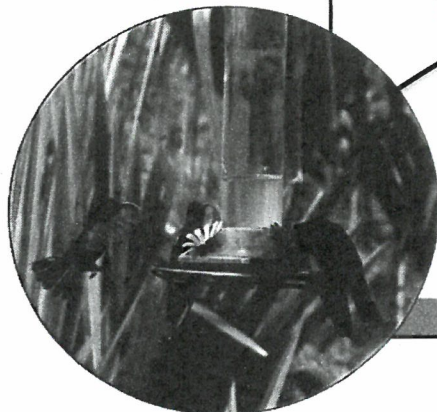

## Fun Facts

**Weight** - They weigh about 4 grams

**Size** - They are between 2-4 inches

**Lifespan** - They average about 5 years of life

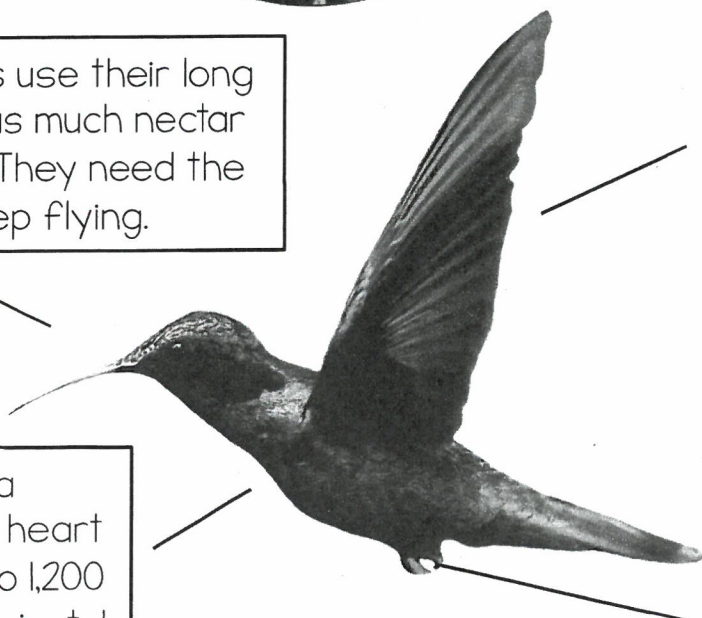

**HUMMING  
BIRDS ARE  
FAST LITTLE  
BIRDS.**

Hummingbirds use their long beak to eat as much nectar as they can. They need the energy to keep flying.

The wings on a hummingbird can flap up to 200 times in one second. That is so fast that it looks like a blur!

When flying, a hummingbirds heart can beat up to 1,200

Hummingbirds use lots of energy when they fly and need time to rest. They use their feet to perch and relax.

Name: \_\_\_\_\_

# HUMMING BIRD:

## Comprehension Questions

1. How did the hummingbird get its name?

---

---

2. List the many ways a hummingbird can fly.

---

---

---

3. What do hummingbirds eat?

---

---

4. Where do hummingbirds live?

---

---

5. What do hummingbirds use their beaks for?

---

---

6. How fast can a hummingbird's wings flap in one minute?

---

7. How long do hummingbirds live?

---

---

# I CAN Find the Main TOPIC & Main Idea

Read the selection and answer the questions

## A TOUCAN'S LUNCH

Toucans live in the tropical rainforests of South America and have colorful diets. They can be seven inches to two feet tall. Their eight-inch beaks are very colorful. The beaks look heavy but are made from keratin, the same as our fingernails. They use their beaks to pick and peel a variety of fruits or to crack nuts. Their favorite fruits are the banana passion fruit since they are brightly colored and easy to find.

Toucans do not fly well so they spend much of their time in trees. They tend to stay in the same places to hunt for their food for the most part. If they cannot find fruits, they will also hunt and eat a variety of lizards, snakes, insects, and tree frogs. They also eat the eggs of other birds and sometimes they eat birds smaller than they are. This is a colorful diet indeed with variety plus!

1. What is the main topic of this passage?

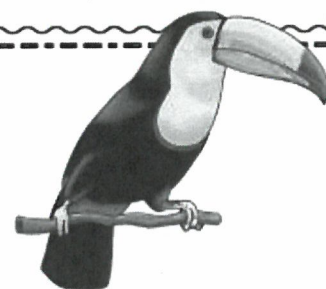

\_\_\_\_\_

2. What is the main idea of the passage?

\_\_\_\_\_  
\_\_\_\_\_

# 19.1 Area

## Vocabulary

area

square units

## Lesson Objectives

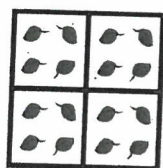

Understand the meaning of area.

Use square units to find the area of plane figures made of squares and half squares.

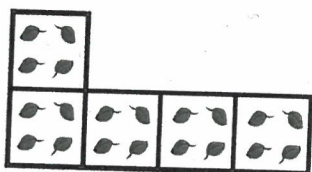

Compare areas of plane figures and make plane figures of the same area.

## Count whole square tiles to find area.

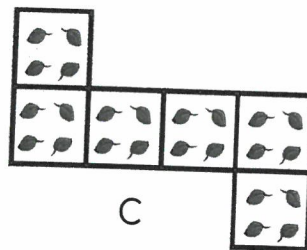

Look at the figures.

A

B

C

Count the number of square tiles in each figure.

Figure A is made up of 4 square tiles.

Figure B is made up of 6 square tiles.

Figure C is made up of 6 square tiles.

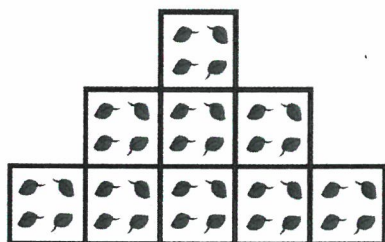

The amount of surface covered by the tiles is the area of each figure.

Let each square tile stand for 1 unit. Figure B is made up of 6 square tiles. So, its area is 6 square units. Figure C has the largest area. Figure A has the smallest area.

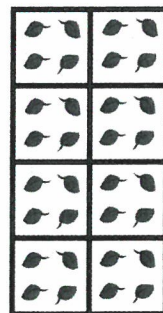

**Area** is the amount of surface covered. It is measured in **square units**.

## Guided Practice

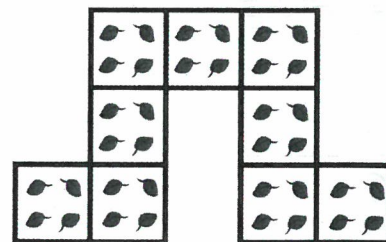

Look at the figures and answer the questions.

A

B

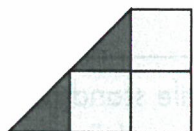

C

- 1 How many square tiles make each figure?
- 2 Each tile is one square unit. What is the area of each figure?
- 3 Which figure has the smallest area?
- 4 Which two figures have the same area?

Learn

## Using square units and half-square units to measure area.

A

 is 1 square unit.

 is  $\frac{1}{2}$  square unit.

 is equal to .

 make 1 square unit.

Figure A is made up of squares  and half-squares .

Figure A is made up of 4 squares of the same size. Its area is 4 square units.

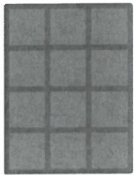

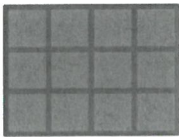

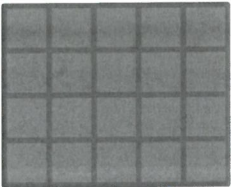

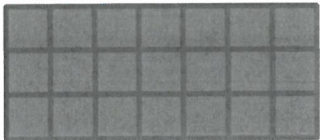

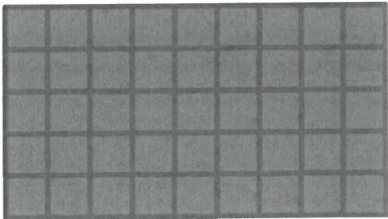

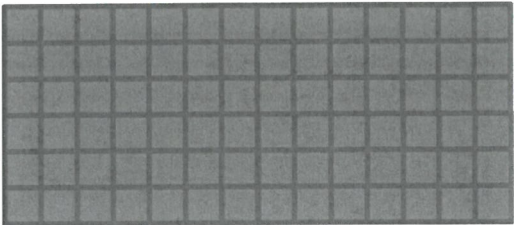

## Areas of rectangles using a grid

### Grade 3 Geometry Worksheet

If each of the square is 1 square unit (shown below), find the area for the rectangles shown below.

 = 1 square unit

	
_____	_____
	
_____	_____
	
_____	_____
	
_____	_____

## 19.2

Square Units  
( $\text{cm}^2$  and  $\text{in}^2$ )

## Lesson Objective

- Use square centimeter and square inch to find and compare the area of figures.

## Vocabulary

square

centimeter ( $\text{cm}^2$ )square inch ( $\text{in}^2$ )

Learn

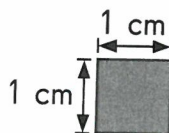

## Find the area of plane figures in square centimeters.

This is a 1-centimeter square.

Each side of the square is 1 centimeter long.

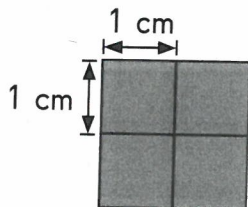

Its area is 1 **square centimeter**.

You can write this as  $1 \text{ cm}^2$ .

a 1-cm square

The square centimeter ( $\text{cm}^2$ ) is a metric unit of measure for area.

a 2-cm square

A 2-centimeter square is made up of four 1-centimeter squares.

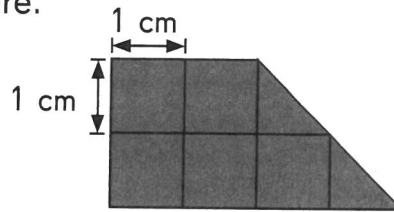

Its area is 4 square centimeters ( $\text{cm}^2$ ).

Continued on next page

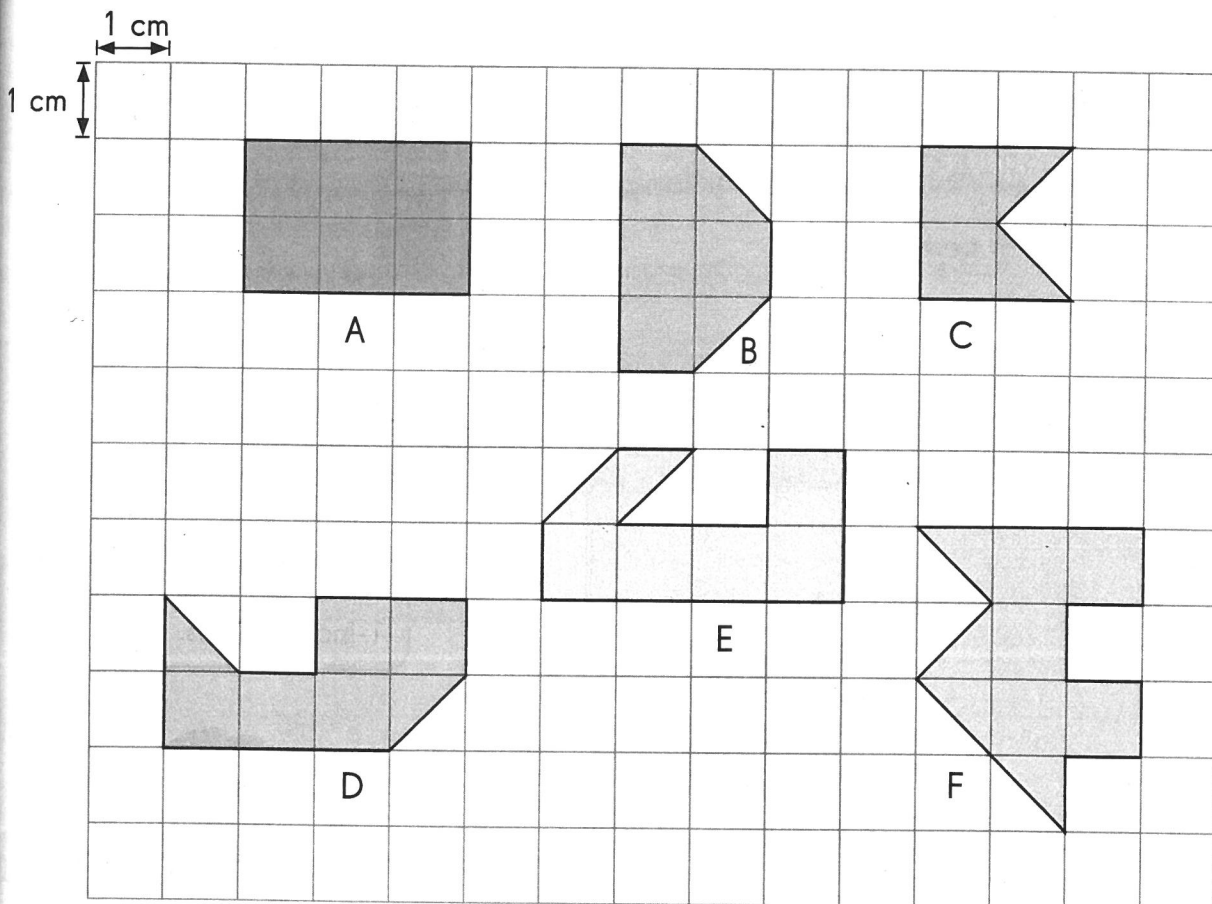

**Solve. The figures are made up of square and half-square tiles.**

- 4 Find the area of this figure.

Area =   $\text{cm}^2$

- 5 Find the area of each figure.

- 6 Which figure has the smallest area? Figure

- 7 Which figure has the largest area? Figure

- 8 Which figures have the same area? Figures , , and

# 19.4 Perimeter and Area

## Lesson Objectives

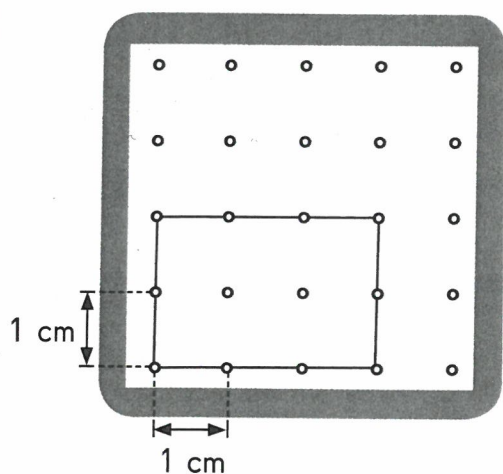

- Understand the meaning of perimeter.
- Find the perimeter of figures formed using small squares.
- Compare the area and perimeter of two figures.

**Vocabulary**  
perimeter

Learn

## Find the perimeter and area of a figure.

Look at the rectangle on the geoboard.

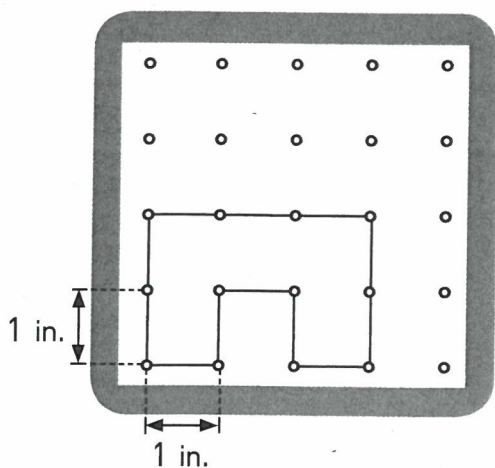

The **perimeter** of the rectangle is the distance around it. To find the perimeter, you find the length of each side of the rectangle in centimeters and add them.

$$3 + 2 + 3 + 2 = 10$$

So, the perimeter of the rectangle is 10 centimeters.

The area of the rectangle is 6 square centimeters.

Look at the figure.

You can also measure perimeter in meters and feet.

The perimeter of this figure is 12 inches.  
Its area is 5 square inches.

Continued on next page

Perimeter can be measured in centimeters (cm), inches (in.), meters (m), and feet (ft).  
Area can be measured in square centimeters (cm<sup>2</sup>), square inches (in.<sup>2</sup>), square meters (m<sup>2</sup>), and square feet (ft<sup>2</sup>).

## Guided Practice

### Complete.

Look at the two figures on the geoboard.

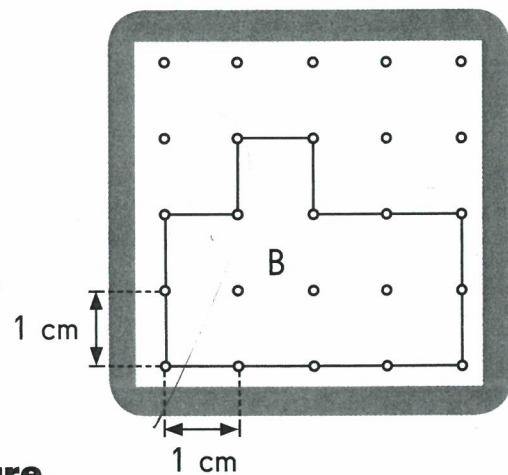

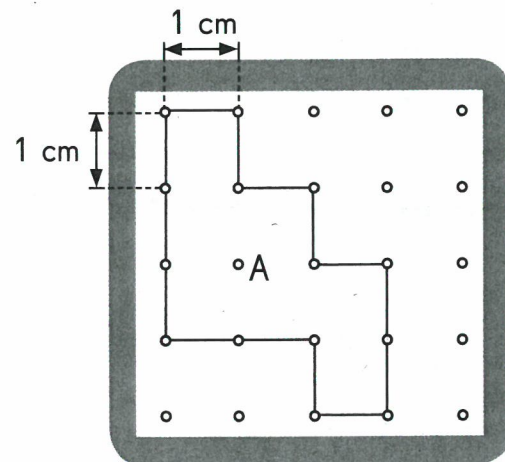

They have the same perimeter.

- 1 The perimeter of each figure is \_\_\_\_\_ centimeters.

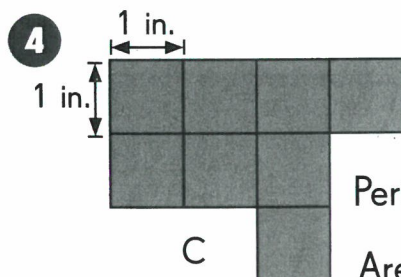

They do not have the same area.

- 2 The area of Figure A is \_\_\_\_\_ square centimeters.

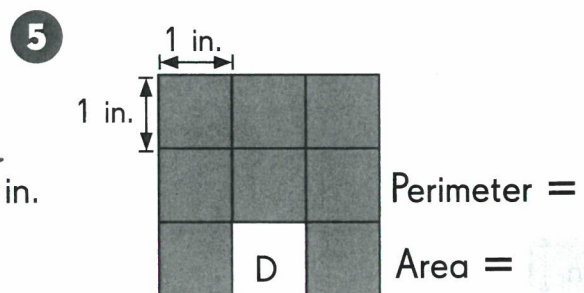

- 3 The area of Figure B is \_\_\_\_\_ square centimeters.

### Find the perimeter and area of each figure.

Perimeter = \_\_\_\_\_ in.  
Area = \_\_\_\_\_ in.<sup>2</sup>

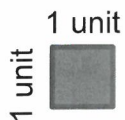

Perimeter = \_\_\_\_\_ in.  
Area = \_\_\_\_\_ in.<sup>2</sup>

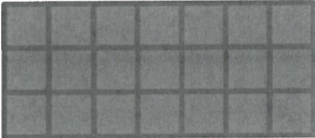

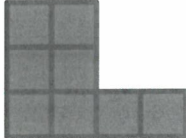

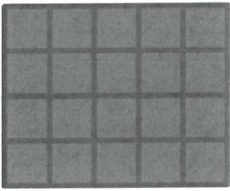

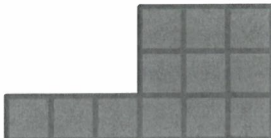

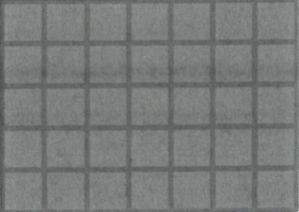

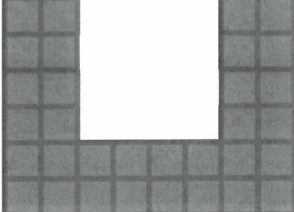

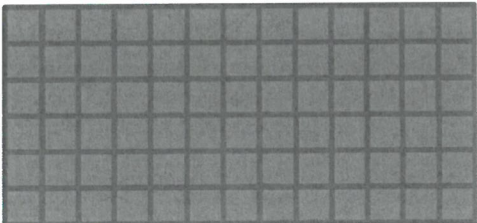

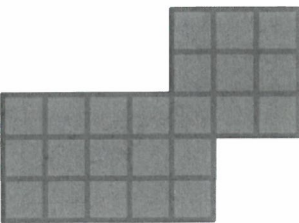

- 6 Do Figures C and D have the same area? Explain your answer.  
7 Do they have the same perimeter? Explain your answer.

## Perimeters of rectangular shapes

### Grade 3 Geometry Worksheet

If each of the square is 1 unit by 1 unit (shown below), find the perimeter for the shapes shown below.

	Pg. 1	Read the passage on squirrels and answer the questions on the back
	Pg. 2	Complete the Main topic and Main Idea page with the passage titled <u>Brown Bears, Oh My!</u> . Read the passage and answer the questions that follow.
	SUBJECT: MATH (packet)	
Check when completed	Page Number/s	Directions
	Pg. 2	Complete the multiplication on the back side of page 2
	Pg. 3 Pg. 4	Read the text book pages on Telling Time on page 3. Then complete the front and back of practice page 4.
	Pg. 5	Read the text book pages on Converting Hours and Minutes. Answer all of the questions by filling in the blanks on the front and back.
	Pg. 6 - 8	Read the text book pages on shapes on page 6. Then complete the activity pages on 7-8.

Week 2

Name: \_\_\_\_\_

# SQUIRREL

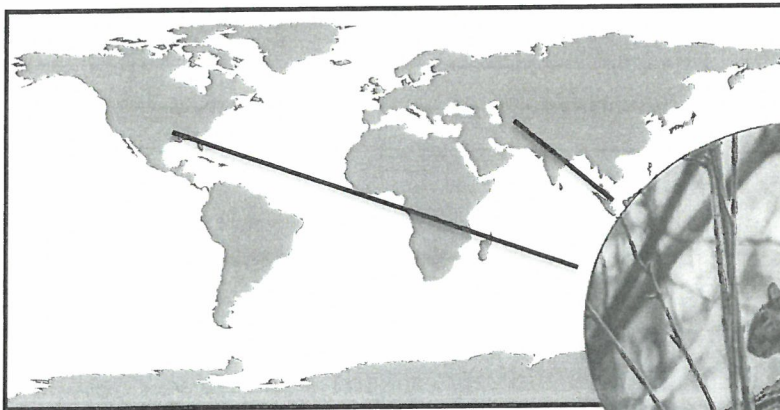

Take a walk outside and you will most likely see a squirrel. There are 280 species of squirrel. Did you know that the word squirrel means shadow tail? They also use their tail to talk to each other. There are 3 different types of squirrels. There are ground squirrels, tree squirrels, and flying squirrels. Squirrels are omnivores, which means they eat plants and meat. They eat nuts, seeds, fruit, insects, baby birds, snakes, and even eggs. Squirrels can be found on every continent in the world except for Australia and Antarctica. They live in areas with trees and woods.

## Fun Facts

**Weight** - They can weigh up to 4 pounds and as little as less than 1 pound

**Size** - They can be as big as 36 inches and as small as 3 inches

**Lifespan** - They can live from 6 years to 20

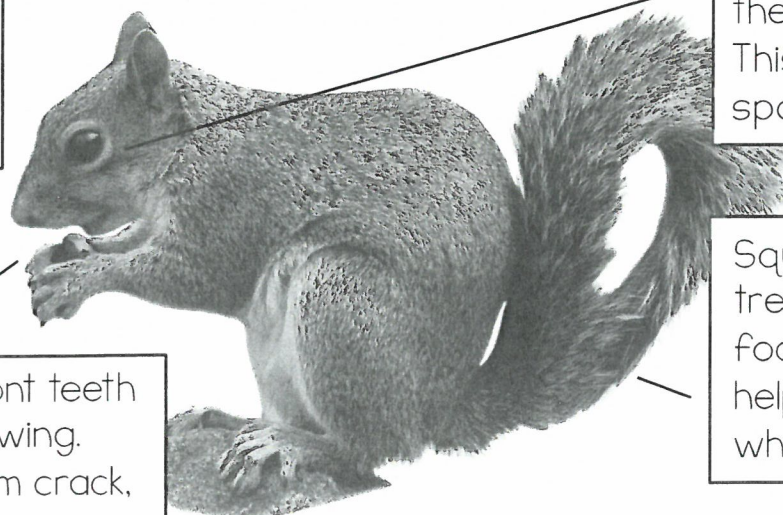

## SQUIRRELS ARE GREAT GATHERERS

Squirrels have a great sense of smell and use their nose to track down food.

Squirrels have big eyes. They can see without turning their head around. This helps them spot food!

Squirrels have 4 front teeth that never stop growing. Their teeth help them crack, chew, and eat food.

Squirrels jump from trees looking for food. Their big tail helps them balance when they jump.

# I CAN FIND the MAIN TOPIC & Main Idea

Read the selection and answer the questions

## BROWN BEARS, Oh MY!

Brown bears live in many parts of the world and are animals to respect. Grizzly bears and Kodiak bears are the largest. They have different colors other than brown as well. Some are black or cream colored. They also have large humps on their backs and very short ears. They can smell food downwind up to 20 miles away so they can smell food in a hiker's backpack if the hiker is within its territory even if that hiker is miles away. They will aggressively come after whatever foods they can smell out.

All bears are *omnivores* which means they eat meat and plants. They eat food like elk, deer, berries and plants. They usually hunt for food at dawn and at dusk. People who visit state parks would do well to remember these feeding times because these bears can be aggressive and territorial. Brown bears are more aggressive than black bears as a rule. They are very powerful and can kill a large animal with one blow! It's best not to provoke a brown bear in its territory.

Bears go into a deep sleep called torpor in winter. They are not true hibernating animals because they can be woken up. I would not want to wake up a sleeping grizzly that has not eaten in weeks! Oh my!

1. What is the main topic of this passage?

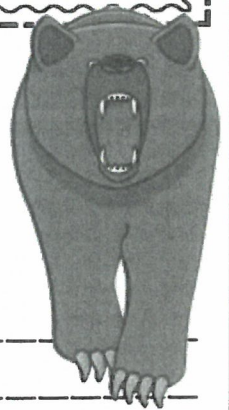

\_\_\_\_\_

2. What is the main idea of the passage?

\_\_\_\_\_

## 16.2

Converting Hours  
and Minutes

## Lesson Objective

- Change minutes to hours or hours to minutes.

## Vocabulary

hours (h)

minutes (min)

Learn

## Convert hours (h) to minutes (min).

Jerry rides for 2 **hours**.How many **minutes** are in 2 hours?

$$1 \text{ h} = 60 \text{ min}$$

$$2 \text{ h} = 60 \text{ min} + 60 \text{ min} = 120 \text{ min}$$

You can also multiply to find the number of minutes.

$$2 \text{ h} = 2 \times 60 \text{ min} = 120 \text{ min}$$

There are 120 minutes in 2 hours.

h stands for hour.

min stands for minutes.

Read 1 h as one hour.

Read 30 min as thirty minutes.

$$1 \text{ h} = 60 \text{ min}$$

$$2 \times 6 = 12$$

$$2 \times 60 = 120$$

## Guided Practice

## Express the time in minutes.

- 1 Jerry took 3 hours to do his homework.  
How many minutes are in 3 hours?

$$3 \text{ h} = \quad \text{min} + \quad \text{min} + \quad \text{min}$$

$$= \quad \text{min}$$

You can also multiply.

$$3 \text{ h} = \quad \times 60 \text{ min}$$

$$= \quad \text{min}$$

There are  $\quad$  minutes in 3 hours.

$$3 \times 6 = \quad$$

$$3 \times 60 = \quad$$

**Convert hours and minutes to minutes.**

Matt plays basketball for 1 hour 10 minutes.  
How many minutes are in 1 hour 10 minutes?

$$\begin{aligned} 1 \text{ h } 10 \text{ min} &= 60 \text{ min} + 10 \text{ min} \\ &= 70 \text{ min} \end{aligned}$$

$$1 \text{ h } 10 \text{ min} \begin{cases} 1 \text{ h} = 60 \text{ min} \\ 10 \text{ min} \end{cases}$$

There are 70 minutes in 1 hour 10 minutes.

**Guided Practice****Express the time in minutes.**

- 2** Kevin's baseball game lasts for 2 hours 30 minutes.  
How many minutes are in 2 hours 30 minutes?

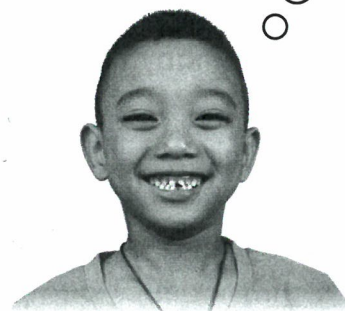

2 hour 30 minutes

$$= \quad \text{min} + \quad \text{min} + \quad \text{min}$$

$$= \quad \text{min}$$

There are  $\quad$  minutes in 2 hours 30 minutes.

$$2 \text{ h } 30 \text{ min} \begin{cases} 2 \text{ h} \\ 30 \text{ min} \end{cases}$$

**Express the time in minutes.**

- 3** 2 h 45 min

$$= \quad \text{min} + \quad \text{min}$$

$$= \quad \text{min}$$

- 4** 4 h 28 min

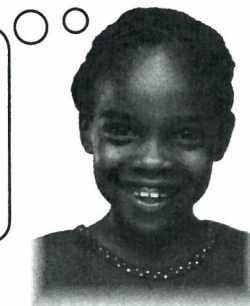

$$= \quad \text{min} + \quad \text{min}$$

$$= \quad \text{min}$$

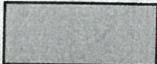

$$\begin{aligned} 1 \text{ h} &= 60 \text{ min} \\ 2 \text{ h} &= 2 \times \quad \text{min} \\ &= \quad \text{min} \end{aligned}$$

$$\begin{aligned} 1 \text{ h} &= 60 \text{ min} \\ 4 \text{ h} &= 4 \times \quad \text{min} \\ &= \quad \text{min} \end{aligned}$$

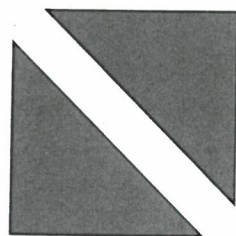

# Recall Prior Knowledge

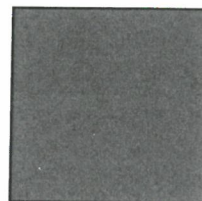

## Counting the number of sides, corners, and angles of plane shapes

Plane Shape	Number of Sides	Number of Corners	Number of Angles
 circle	0	0	0
 triangle	3	3	3
 square	4	4	4
 rectangle	4	4	4
 trapezoid	4	4	4
 hexagon	6	6	6

## Combining plane shapes to form other plane shapes

triangles

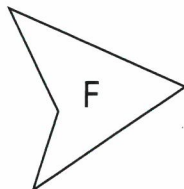

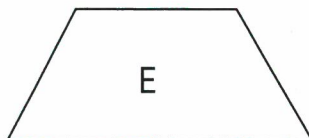

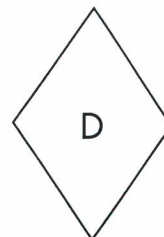

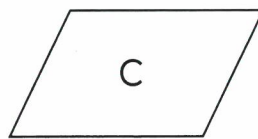

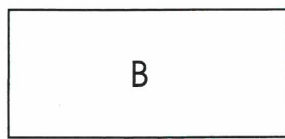

square

Two triangles can be combined to form a square.

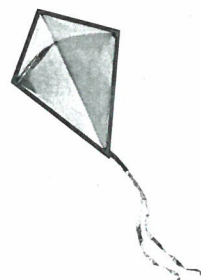

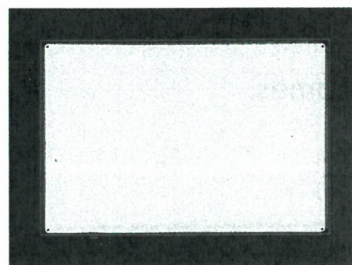

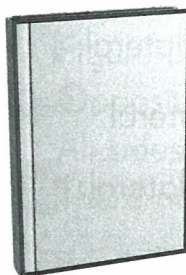

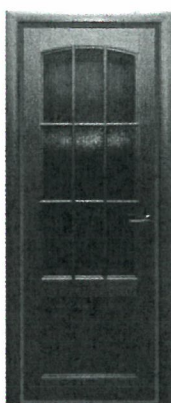

**Identify quadrilaterals.**

These are **quadrilaterals**.

Quadrilaterals are polygons with 4 sides and 4 angles.

The outline of the door is a quadrilateral because it has 4 sides.

The outline of a notebook is a quadrilateral.

The outline of a television, a kite, and a whiteboard is a quadrilateral too.

## Identifying quadrilaterals

### 3RD GRADE SCHOOL CLOSING WORK PACKET

WEEK 3		
	SUBJECT: CKLA (workbook)	
Check when completed	Page Number/s	Directions
	Pg. 113-114 Pg. 109-110	Read the passage 10.3 on pages 113-114. Then complete the cause and effect activity on pages 109-110
	Pg. 135-137 Pg. 125 Pg. 127-128	Read the passage 12.6 on pages 135-137. Then complete the review on page 125 and the True/False activity on pages 127-128.
	SUBJECT: ELA (packet)	
Check when completed	Page Number/s	Directions
	Pg. 1	Read the passage on butterflies and answer the questions on the back
	Pg. 2	Complete the Main topic and Main Idea page with the passage titled <u>Sea Dragons Vs. Seahorses</u> . Read the passage and answer the questions that follow.
	SUBJECT: MATH (packet)	
Check when completed	Page Number/s	Directions
	Pg. 2 (back)	Read over the C.U.B.E.S. word problem strategy on the back of page 2. Refer back to this page as needed.
	Pg. 3 - 5	Using the C.U.B.E.S. strategy, solve the word problems on the front and back of pages 3-5

# BUTTERFLY

The weather is warming up and the butterflies are coming out! Did you know there are more than 20,000 species of butterflies? Butterflies are insects. They have four stages of life: egg, caterpillar, pupa, and adult. As an adult, butterflies have four beautiful scaly wings. They can't fly if their body temperature is not above 86 degrees. Some butterflies can fly as fast as 30 miles per hour!. Butterflies live all over the world except for Antarctica. Many butterflies are found in tropical rainforests, but they can live in many different climates and habitats.

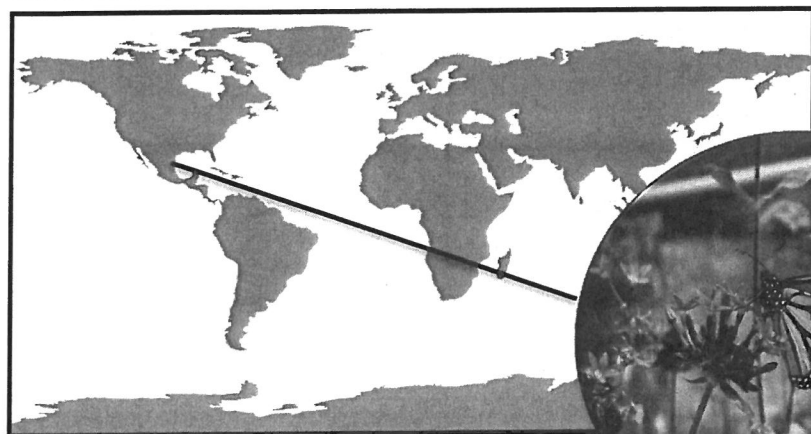

## Fun Facts

**Weight** - They can weigh between 0.04-0.3 grams

**Size** - Their size can range from 1/8th inch up to 12 inches

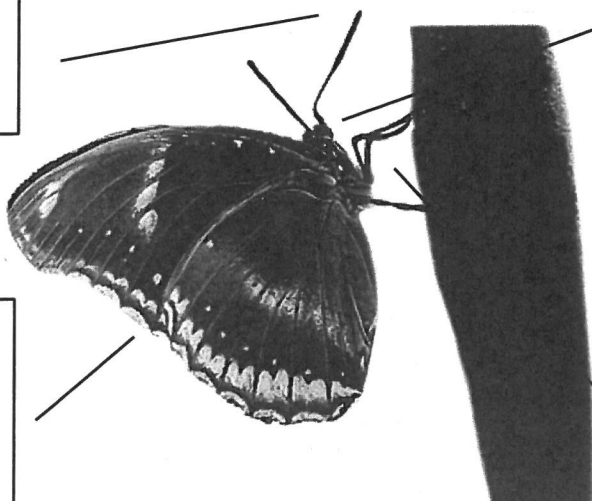

**Lifespan** - They can live up to 12 months

**BUTTERFLIES  
ARE  
INTERESTING  
INSECTS.**

Butterflies smell things using their antennae.

Butterflies can be many different colors. Their colors help them blend in with the flowers!

Butterflies have a tongue shaped like a tube. Their tongue helps them drink or suck on the nectar from flowers.

Butterflies taste things with their feet!

# BUTTERFLY:

## Comprehension Questions

1. How many species of butterflies are there?

---

---

---

2. What are the four stages of a butterfly's life?

---

---

3. True or False: A butterfly can not fly if their body temperature is not above 86 degrees.

---

4. What do butterflies drink from flowers?

---

---

5. What do butterflies use their antennae for?

---

---

6. What does a butterfly's color help them do?

---

7. What is a butterfly's tongue shaped like?

---

---

Read the selection and answer the questions

## sea dragons vs. seahorses

Sea dragons are part of the seahorse family and an Australian treasure. They only live along the coast of Australia, whereas seahorses live in many oceans around the world. The Australian government does not let people catch sea dragons to make medicines or to have as pets because they are near endangered.

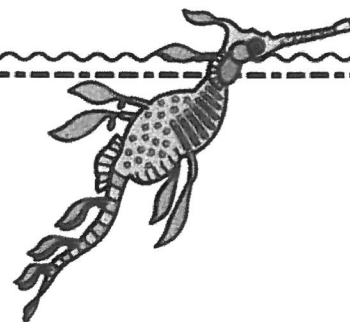

Sea dragons have extended body parts that look a bit like leaves. This helps them blend in with sea plants. This makes it hard for predators to find them.

Sea dragons are usually bigger than seahorses, however, they cannot defend themselves like seahorses by curling their tails around plants. They also cannot change color to match sea plants like seahorses can. Male sea dragons do carry the female's eggs, but not in their stomachs like seahorse males. Sea dragon males carry their eggs on their colorful tails. Sea dragons have many beautiful colors on their bodies from yellow and green to brownish and even red.

Sea dragons do not bite. Like seahorses, they do not have teeth so they cannot chew food. They suck food through their tube-like snouts. They eat tiny shrimp and crustaceans just like seahorses do.

While there are many similarities in seahorses and sea dragons, there are some distinct differences to note. It is plain to see that sea dragons are an Australian treasure to protect for years to come.

### **Circle Key Numbers & Units**

What are the important facts?

### **Underline the Question**

What am I being asked to solve?

### **Box Math “Action” Words**

What operation will I do?

### **Evaluate & Eliminate**

What steps do I take?

What info don't I need?

### **Show your Work & Check**

Does my answer look right?

How do I check?

Using **CUBES**, solve the following single step word problems.

Mr. Jackson wrote a book on Fairy Tales and released 50, 525 copies. Because the book was popular among the readers, the publishers decided to publish a second edition with 40, 399 copies. What was the total number of books published?

<b>C</b>	Circle the Key Number & Units
<b>U</b>	Underline the Question
<b>B</b>	Box Math Action Words
<b>E</b>	Evaluate & Eliminate
<b>S</b>	Show your Work & Check

A shopkeeper bought 240 eggs and sold 148 eggs. The shopkeeper also had 53 chickens. How many eggs were left unsold?

<b>C</b>	Circle the Key Number & Units
