

Suggested Math TimeLine

1) Daily – NWEA readiness prep ON IXL.

- ⇒ There are anywhere from 22-24 standards that are connected to your NWEA score.
- ⇒ Work on IXL to practice these skills.
- ⇒ We will not be together for 18 days (not including weekends) so that is enough for you to take on ONE standard per day, AND SOMEDAYS MORE!!
- ⇒ I would recommend that you focus on your LOWEST scoring area – that is what’s pulling your overall score down. If you worked on those standards the entire break, that would be fine with me!
- ⇒ You will find your NWEA score and breakdown along with the suggested standards in your envelope (that you can pick up at NBCA) AND I will email it to the parent email we have on file.
- ⇒ You are NOT limited to IXL. If you prefer videos, use Khan Academy.org (it’s free)
- ⇒ On IXL, your goal should be 100 smart points per standard.

2) Weekly – Grade Level Review

- ⇒ Each weekly assignment has 10 problems that review our grade level content.
- ⇒ Students should work through one “weekly assignment” per week.
- ⇒ I am including additional weekly pages in case students would like to work ahead.
